

THE STATEMENT OF PURPOSE

Name : Suresh vallivedu
Passport No : T2502800
Nationality : Indian
Institution : Algoma university
Student ID : 249511960
DLI : O19395422197

Date : 30-05-2024

JUSTIFICATION LETTER

To,
Visa Officer,
High Commission of Canada

Sub: Resubmission of my Canadian Study Permit application under SDS category.

Respected Sir/Madam,

I, Suresh, had applied for a student visa to study Graduate Certificate (Human Resources & Business Management) at Algoma University, Canada, for which, unfortunately, my profile has been rejected.

- I am not satisfied that you will leave Canada at the end of your stay as required by paragraph R216(1)(b) of the IRPR (<https://laws-lois.justice.gc.ca/eng/regulations/sor-2002-227/section-216.html>). I am refusing your application because you have not established that you will leave Canada, based on the following factors:
- The purpose of your visit to Canada is not consistent with a temporary stay given the details you have provided in your application.

I would like to bring your attention to my calibre and my motivation behind coming to Canada to pursue this program:

Graduate Certificate (Human Resources & Business Management)
Algoma University

Confirming My Return to India:

Building a satisfactory career is all about logical progression. “Work, Learn, and Grow” is a continuous process. As a Bachelor of Electrical and Electronics Engineer in India with almost 3 years of work experience, I have acquired complete proficiency in technical work. The next logical goal for me is to lead technical work. Of course, as mentioned, my work has involved some aspects of management. However, I am not equipped with the leadership skills to manage business and its greatest assets, people, on a larger scale. Aiming to move forward in my career

and reach the top, it is essential that I acquire managerial skills by attending a higher study program. This program from Canada will be proof of my capabilities to manage large-scale organizations and their technical work in managerial roles. As a result, my career will be bright and rewarding in India.

Having gained some work experience in India, I am already aware of the demands of the industries. With a Canadian qualification, I will certainly be able to meet those demands and stand out from the crowd.

Moreover, my parents are in India. As a son, I have sincere responsibilities toward my parents. I wish to be with them in their old age and take care of them. I assure you that the purpose of visiting Canada is purely for academic purposes. After which, I will return to India to maximize the advantages of my Canadian qualification professionally, financially, and socially.

Eligibility to Study in Canada:

I scored a 9.5 CGPA in my 10th grade in 2014.

Later, I secured 94.8% in my 12th grade in 2016 in the Science stream, with Physics, Chemistry, and Mathematics as my majors.

After that, I enrolled in a Bachelor of Electrical and Electronics Engineering program. I got my bachelor's degree with an 8.12 CGPA in 2020.

During studies, I worked on several projects that helped me become proficient in my field. One such endeavor involved a project on "3-phase to 1-phase AC-DC-AC Topology Based On Multi-Converter in Electric Railway Application." This project significantly enhanced my technical prowess and served as invaluable investments of time. Moreover, serving as a Project Lead provided me with invaluable insights into high-tech engineering projects, igniting a passion for leadership within me. Moreover, my involvement in these projects not only helped improve my technical forte but also deepened my understanding of project management complexities when managing multiple endeavors simultaneously.

I was also an active participant in extra-curricular activities. Whether it was participating in debates and quizzes, or getting a certificate for "HACKTRACK", an ethical hacking workshop or winning a group prize on the concept of "PHOTO VOLTAIC EFFECT", my bachelor's studies and practical exposure certainly prepared me to stand in line with the international students aiming to pursue their advanced studies in this field, for which I am truly thankful and consider it a win.

Entering the professional world, I started working as a Programmer Analyst at Cognizant Technology Solutions in Coimbatore, Tamil Nādu, from September 1, 2021, to October 4, 2023, I focused on two key areas: Power BI and Azure Data Factory.

In the realm of Power BI, my primary responsibilities revolved around creating reports and dashboards by working with extensive datasets, utilizing tools like Power BI and other reporting software. As a Power BI analyst, I took charge of designing, constructing, and deploying reports and dashboards, meeting the operational and analytical needs of the organization. I excelled in understanding business requirements, translating them into functional specifications for reporting applications, and swiftly shaping data into actionable insights. My proficiency extended to various tools and systems within the MS SQL Server ecosystem, including SSRS, Power Query, Power BI, and DAX, enabling me to deliver reporting solutions tailored to business objectives.

In the domain of Azure Data Factory, I played a crucial role in orchestrating data movement and transformation at scale within the cloud environment. My responsibilities encompassed ensuring data integrity, optimizing data storage and usage, and developing innovative solutions using Azure services and other tools. I demonstrated expertise in solution design, automation, and deployment of production-standard code, emphasizing practices such as unit testing, continuous integration, and versioning for enhanced reliability and efficiency. I specialized in building data pipelines to consolidate disparate data sources, facilitating seamless integration and analysis. I consistently maintained a focus on data quality, troubleshooting issues, and optimizing data warehouse performance to support real-time reporting systems and analytics applications.

Currently, I have been working as an SQL Data Analyst with Genpact, wherein my responsibilities include ensuring data accuracy, integrity, and accessibility within the organization. I've been actively involved in translating, merging, and cleaning up data to create conceptual, logical, and physical data models. I also manage all activities related to data cleansing, data quality assurance, and data consolidation, adhering to industry standards and best practices. Identifying, developing, and documenting data standardization procedures, enrichment operations, and validation processes are also within my job responsibilities. I ensure that data security requirements are met and implement effective data exception handling processes to address any discrepancies. I also address technical difficulties related to data retrieval and reporting, leveraging my expertise in SQL and database management systems. Moreover, I design and develop custom applications tailored to meet specific management and reporting needs, ensuring that the database infrastructure adequately supports organizational requirements. Thus, I actively identify recurring issues, conduct root cause analysis, and propose effective solutions to prevent future occurrences, contributing to continuous improvement and optimization of data management processes within the organization.

Throughout my work experience, I have always played a vital role in decision-making. I have demonstrated excellent team spirit and understood the importance of managing an organization's greatest assets, human resources. The success and failure of an organization depends upon the same. In order to move forward in my career and reach the top of my career as a Business Manager, I have to acquire formal qualification in the Human Resources and Business Management field.

Why Canada?

While considering the global education opportunities, Canada is the most appealing option for me. Renowned for its safety and quietness, Canada is clearly classified as one of the most peaceful countries in the world. The educational system in Canada strives to adjust its programs

according to the industry requirements, which enables students to get the job of their dreams. Canadians have the reputation of being welcoming and friendly toward foreign students which makes the country one of the most attractive options for education. Canadian universities and other educational organizations are always flexible to add the emerging trends in any sector to their curricula. They follow global standards, they provide quality education and research consistently. This strategy facilitates the students to think creatively and inspires independent studying, which helps move them from being dependent on instructors and textbooks. I am sure that my educational path in Canada will add to the richness of my personality.

Why the Algoma University?

I select Algoma University in particular for its clear emphasis on the value of diversity and the need for the inclusion of different identities and backgrounds. This unique educational establishment is celebrating its 58th-anniversary showing that it has always been able to adjust to the new demands posed by the society we live in. Algoma University is recognized worldwide for its excellent teaching, new age programs, as well as being involved with international networks particularly in India and other Asian countries. The school facility is also equipped to develop practical and experiential learning, which is critical in the Business Management field as it calls for theoretical knowledge most of the time. Similarly, I have identified the university as a centre of renowned international faculty as a desired nurturing site.

Language Abilities:

To study in Canada, I took a TOEFL test and scored 94 Points overall; Listening: 24, Reading: 28, Writing: 22, and Speaking: 20.

Benefits of Studying in Canada and Building My Career in India:

The major reason behind choosing to study in Canada is to gain a competitive advantage in India. This international academic journey is highly valued in India. Canada is home to many successful companies that have marked their presence on global platforms. As a result, Canadian academic institutes offer industry-ready programs with practical teaching pedagogy that will boost my confidence. Indian employers will count on my skills, which will help me secure jobs with leading technical companies in India. I can work in managerial roles, have a team working under me, and lead a company toward further growth. This allows for challenges and ensures a successful professional career in India.

Future Plans in India:

- With a Canadian qualification, I can work with any of the leading Electrical and Electronics companies in India, such as Larsen & Toubro, Tata Consultancy Services, Bharat Heavy Electricals Limited, Siemens India, Schneider Electric India, Havells India, Wipro Limited, or Mahindra Electric Mobility Limited.
- I aim to help the company expand internationally and distinguish itself from its competitors. I will be adept at managing various organizational tasks, from securing technical projects to leading teams toward success. I'll supervise functions such as marketing, finance, and daily

technical operations, ensuring seamless functioning and tackling any challenges that arise. My expertise can significantly contribute to companies looking to expand their operations on a global scale.

- Armed with a Canadian qualification, I will be qualified to work as a Senior Business Manager or a Senior Technical Leader in India. On this role, I can earn INR 11 to 12 Lakhs in India, which will help me live a healthy and happy life.

Sponsorship Details:

My family considers my studies in Canada as an investment in my career in India. They are happy to sponsor my studies in Canada. **We have already paid 19,065 CAD toward my tuition-fees and secured the GIC amount of 20,831 CAD. We are financially very sound. In order to be responsible for my studies, I insisted on taking an educational loan of INR 26,00,000. My father has also kept aside INR 6,58,700 (CAD 10,674) to help me with my studies in Canada.** I have attached the financial documents for your perusal.

Conclusion:

My academics and work experience will serve as a base to attend this coveted program.

My language skills are sufficient to study in Canada.

I have learned the basics of this field during my studies and work experience. Hence, for the logical progression of my career, I aim to learn this program.

I have also proven financial abilities to study in your country.

I assure you that my intent of travel is for studies only and I will be staying in Canada temporarily for my education. After that, I will return to India with a Canadian qualification.

I am confident that this program will lead me to brighter career prospects with the utmost career satisfaction, and that is why I request you to allow me to attend this coveted program in your country.

Suresh
